

Real World Problem Scenario

Scenario:	Service Scarcity
Business:	Memorial Health System
Business Participant:	DeeAnn Gehlauf - Vice President of Business and Organization Development
Career Cluster(s):	Business Management and Administration, Finance
Grade Level:	K-8
Standards & Skills:	Economics/scarcity(3) Economic decision making skills(3-8) Production and consumption(3-6) Financial Literacy(3) Geography Human Systems (3-5)

Problem Description:

The amount of places for local people to receive medical care in a rural area is scarce. What can the local hospital do about this?

Things to be considered or defined for the solution:

- Size of the population
- Can workers be found to work in the new place?
- How much will it cost to build something new(land, building materials, etc)?
- What services need to be provided(emergency room, family doctor, physical therapy, etc)?
